

Google's [Chromecast](#) is a revolutionary device that allows viewers to "cast" content from a Google Chrome browser directly to television. **Requirements:**

NOTE: The Chromecast device and the device playing your stream must be connected to the same network.

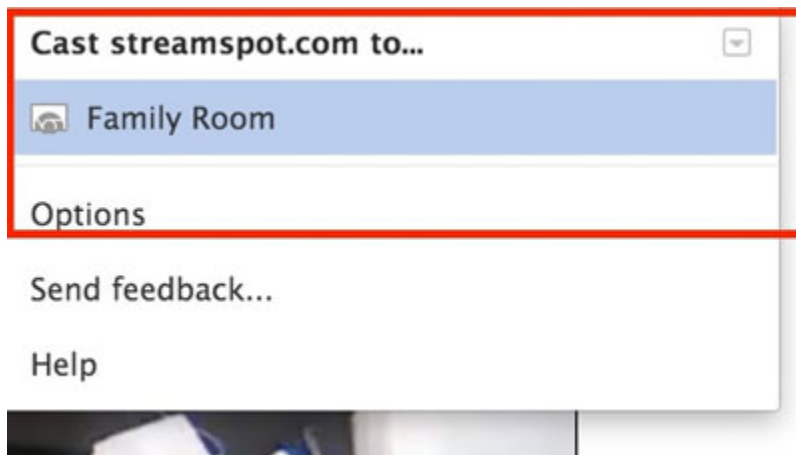

- Google Chrome with the Chromecast extension [downloaded](#) and enabled.

Instructions:

1. During a live or on-demand broadcast, you will see the Chromecast icon in the top-right of your player.

2. Choose the appropriate Chromecast device from the list (please note that there may be more than one on your network).

3. The broadcast will begin playing on your television. To stop, simply click on the **"Back"** icon on the player.
